

## MEETING REPORT

**Team Name:** DevsCreed **Date of Meeting:** 03.04.2021

**Start Time:** 20:00 **End Time:** 21:30 **Meeting Location:** Google Meet

**Moderator:** Armela Ligori **Recorder:** Devid Duma

**Other Members Present:** Armela Ligori, Denado Rabeli, Denisa Bicaku, Devid Duma, Julian Lila, Aniledio Lami

**Members Absent:** none

### Topics Discussed:

This week we discussed which steps we should take next for our project. The main topics that we discussed were the following:

1. We discussed how we should write our personal logs in the repository.
2. We did some thorough research on which software stack we should use for our project.
3. We planned some meetings with potential clients for the project

### Decisions Made:

1. The first decision we made was to do an Eye Clinic Management System as our project.  
Such solutions are sparse in Albania's market and we believe that our project could be adopted by eye clinics in the future.

2. We decided to go with PHP/Laravel for the backend and HTML, CSS, jQuery, Javascript, Bootstrap for the frontend.
3. The reason we decided to go with PHP/Laravel was mainly because PHP is still a standard in today's web development, it is used by many companies. Laravel was the natural choice for the framework because it would allow us to build a microservice architecture for the backend in a fast, secure and scalable way.
4. We avoided frameworks like Java Enterprise, .NET or PHP/Symphony because they are meant for very complex enterprise solutions which go far beyond the scope of our project.

**Tasks Assigned:**

1. Each one of us was assigned the task of learning through different resources online about the Laravel framework until our next meeting.
2. We assigned the task of meeting and asking some eye clinics about potential features that our management system will have that would be useful to the eye clinics. This would include features related to the day to day work of assistants or secretaries but also about their clients usual wishes. The clinic's client wishes are important to consider since they would allow eye clinics to better serve their clients, which in turn could maximise their revenues.

**Time, Place, and Agenda for Next Meeting:**

19:30 10.04.2021, Google Meet, Step 4 and 5
